INFORMATION DISCLOSURE STATEMENT

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Inventor/Applicant: Brad A. Armstrong

Title: VARIABLE-CONDUCTANCE SENSOR WITH ELASTOMERIC DOME-CAP

Dear Sir,

REMARKS:

I have a related co-pending U.S. non-provisional patent application titled "GAME CONTROLLER WITH ANALOG PRESSURE SENSOR(S)" filed Oct. 1, 1997, serial number 08/942,450, and which claims the benefit of a Provisional application of the same title filed Sept. 17, 1997, serial number 60/059,125. The sensors of the related applications are variable-conductance sensors which are incorporated in a two handed game controller host device.

I also have another co-pending U.S. non-provisional patent application titled VARIABLE-CONDUCTANCE SENSOR which was filed by the express mail process on June 29, 1998 which should be the filing date therefore, but I have not yet been notified of the serial number or art unit.

I believe the present claimed invention is patentable over the prior art specifically addressed in the instant application. I also believe the present invention is patentable over the inventions of my above mentioned co-pending applications, but wish the issues pertaining to Double Patenting be considered by the PTO Examiners, as I want everything to be proper when my applications issue as Patents. Thank you for your consideration and assistance.

Respectfully;

Date: July 24, 1998
Brad A. Armstrong, Inventor/Applicant
